BASIC ELECTRODE RANGE

« Critical assemblies »

SELECTARC B58
**SELECTARC B58**

**UNIVERSAL BASIC 7018**

Electrode with thick basic coating for high security assemblies, for a use at operational temperatures between -40°C and + 400°C - Dual polarity but preferably for DC.

**Weldable steel range:**
Construction steels for general use, ship steels, steels for boiler and pressure vessels, fine grained steels, steels for tubes. Moulded steels and for heat treatment.

**Main Applications:**
- Pressure vessels, piping, ship building...

**Product Advantages:**
- Very good operator appeal
- Easy striking and re-striking
- Easy slag removal
- Excellent resilience values down to -40°C
- Great mechanical properties and high resistance to cracking

**New packaging with ergonomic easy opening!**

**More information in our technical data sheet on:**
http://www.fsh-welding.com/

**Find our full range of products on our literature on:** www.fsh-welding.com

In our range of Basic Electrodes, also look at our: Selectarc B7018S and Selectarc B7016Sp!
